

## Diving and Hyperbaric Medicine (DHM) statement on conflicts of interest

All submissions to DHM must be accompanied by the European Association of Science Editors (EASE) contributions and conflicts of interest form ([www.ease.org.uk/publications/ease-form](http://www.ease.org.uk/publications/ease-form)), completed and signed by all authors. If your paper is accepted and any conflicts have been listed here, then more detailed information will be required using the International Committee of Medical Journal Editors (ICMJE) form ([http://www.icmje.org/coi\\_disclosure.pdf](http://www.icmje.org/coi_disclosure.pdf)). A form for each author for whom a potential conflict was listed must be submitted.

All potential conflicts of interest, financial or otherwise (e.g., consultancies, equity interests, patent-licensing arrangements, lack of access to data, or lack of control of the decision to publish) by any author must be declared. DHM reserves the right to seek further clarification as necessary. All conflicts or a declaration of no conflicts will appear at the end of the published article. Failure to report potential conflicts of interest prior to peer review may result in publication delays or rejection of the manuscript.

Members of the Editorial Board of DHM and other reviewers also should advise the Editor-in-Chief (E-i-C) of a potential conflict of interest in relation to a paper they have been invited to review or should recuse themselves from reviewing that paper. When the E-i-C submits a paper to DHM, the paper is automatically assigned to an Associate Editor who will handle all aspects of the peer review of the paper. The Associate Editor's decision regarding publication is final and the E-i-C must have no input to such decisions.

Conflicts of interest are relatively uncommon within the specialty of diving and hyperbaric medicine and, if present, usually minor. This largely reflects the lack of involvement of the pharmaceutical industry in these areas of medicine. It is not possible to clarify what conflict situations might result in a manuscript being rejected by DHM; this would be dealt with on a rare case-by-case basis.

Authors should consult the World Association of Medical Editors (WAME) website <http://www.wame.org/about/conflict-of-interest-in-peer-reviewed-medical> if they need further clarification.
